BEST PRACTICES

2019-2020

BEST PRACTICE I

1. Title of the Practice:

Financial Aid to the deserving students by the college

2. Objectives of the Practice

It has been obtained from the profile students joining various courses of the college that there are many students coming from the rural areas with low economic back ground. Their parents are unable to provide them a sustained financial support because agriculture being a gamble with rain in the district, is not a source of assured income.

3. So, the noble objectives of the practice are

- To extend financial aid to the poor students, especially from the rural, to save them from discontinuation of their studies owing to poverty.
- To support financially all the deserving poor students without any discrimination of caste, creed or gender.
- To promote the 'equality' among the students
- To inculcate the values of 'generosity' and a 'sense of social responsibility' among the students. The expected outcome is that the students should be able to complete their degrees with good marks. The beneficiaries should treat the needy with the principle of 'lend a helping hand without discrimination.' The Context The noble objective had its teething as well as challenging troubles in its designing and implementation.
- Pooling up of the required resources was a tough task.
- After many awareness sittings with the all concerned, the college set up a 'hundi' on the campus for voluntary donations by students, staff and other visitors including charity organizations. The college struggled a lot in deciding the eligibility criterion for the aid.
- After comprehensive deliberations with students and teachers, it was decided to extend the benefit to all the poor students, who do not have the advantage of government or endowment scholarships, without any discrimination of caste, creed or gender.
- Verification of the financial backwardness of the aspirants was yet another challenge.
- The management has insisted on strict adherence to the rules framed about this fund in spite of the influential sections' and caste associations' undue interference in the implementation of the practice. The Practice In and around the areas of the college, there has been a long history of frequent droughts and famines, which have ravaged the rural life throwing the people into miserable conditions of abject poverty, illiteracy and ill-health. In a situation of such dire poverty, whatever meagre resources available are used primarily to make both ends meet. So, sending their children to the town for higher education becomes almost impossibility for the poor parents in the rural areas, in the context of higher education demanding higher amounts of money. Though, sometimes, they do venture to admit their children to colleges in the town, they are unable to give sustained financial support throughout the course of study because agriculture, being a

gamble with rain in the district, is not a source of assured income. So, it is evident that without financial support from an external source, the rural youth cannot hope to successfully complete their higher studies. This illustrious institution, true to its legacy of pro-poor-student attitude since its inception, has taken a firm resolve to extend all possible financial support to the deserving students and help them to realize their fond dream of acquiring higher education. For this, the college Trust collected as voluntary donations from Management and other Sources like NGOs. The financial support is extended to all the deserving poor students without any discrimination of caste, creed or gender. The students whose parents do not have fixed reasonable source of income and do not enjoy any other financial assistance in the form of social welfare or endowment scholarships are eligible for the aid. A duly constituted committee of three senior Persons of the college scrutinizes the applications received from the aspirants for the aid from the Trust It finalizes the list of eligible students for the aid after due verification of the documentary evidence enclosed and strictly following the guidelines framed for the purpose, and submits the same to the Principal for sanctioning the actual amount of the aid. Endowment Scholarships and the individual teachers' help is also taken for the financial assistance. The interest earned on each endowment is given as scholarship to such of the students as specified in the endowment like, meritorious and poor students, Sports students, topper of marks among girls, students who stand first subjects at the terminal examinations and so on. Apart from the monetary aspect, endowment scholarships are a proof of academic achievement and hence, the students are developing a keen spirit of competition to secure the endowment scholarships the another source of the aid is our faculty members. Drawing inspiration from institution's legacy of pro-poor-student attitude and action, wherever possible, they are paying the tuition fee and examination fee of regular and industrious students who are unable to pay the fees owing to poverty. Lack of will on the part of the majority of the elite and successive droughts and famines in the district are the known constraints. Evidence of Success Student Mr. Suresh now is Assistant Librarian, was helped financially in a big way by paying his tuition fee. Now he is a better student with improved results working hard with commitment to his studies and society. This way the practice has a positive impact on the academic abilities and attitudinal changes among the beneficiaries. The review results of the aid indicate that the humble assistance not only enables the poor students to acquire higher education but also moulds them to be responsible citizens to continue the legacy of helping the students of successive batches.

BEST PRACTICE II

1. Title of the Practice: Vocational Skills and Entrepreneurial Development for Women
2. The Objectives of the Practice:
 - Inculcate independent work abilities to the students.
